

**OBJECTIVE:**

A dental hygiene position at a state of the art office where commitment to quality dental care and the promotion of overall health is valued.

**HIGHLIGHTS AND QUALIFICATIONS**

- Warm, sincere, and professional relations with patients and co-workers.
- Passionate about the total health of people and the environment.
- Highly adaptable: able to adjust readily to different environmental conditions and expectations with a resilient and sunny disposition.
- Detail-oriented in prophylactic and restorative dentistry with an eye for color, shape, and texture.
- Enthusiastic and committed; a go-getter who keeps pressing forward until the goal is achieved.
- Well organized and focused in coordinating appointments, treatment plans, and follow-through.
- Genuinely interested in disease prevention and life sciences.

**DENTAL HYGIENE CLINICAL EXPERIENCE**

- Provided oral prophylactic services with geriatric, pediatric, adolescent, medically compromised patients, and a unique assortment of personality types.
- Removed calculus, stains and plaque using ultrasonic scalers, hand and rotary instruments.
- Efficiently took, developed, and interpreted traditional and digital X-rays (sensors and plates).
- Successfully delivered local anesthetic to a diverse population.
- Performed thorough oral health assessments, dental cancer screenings, and nutritional counseling.
- Provided preventative services: effectively applied sealants and fluoride varnish.
- Documented and presented Treatment Plans to patients.
- Placed and finished Class I-V amalgam and composite restorations.
- Thoroughly sterilized instruments and promptly sanitized rooms.
- Registered patients by obtaining biographical, insurance, and health history information while accurately entering it into Eaglesoft system. Created charts for medical records.
- Reviewed and taught home care techniques through demonstration.
